Height: 14 inches

Spread: 4 feet

Spacing: 24 inches

Sunlight: ○

Hardiness Zone: (annual)

Other Names: Beggarticks

Description:

A low growing trailing variety perfect for hanging baskets, patio containers or garden beds and borders; an abundance of cheery yellow blooms cascade from green ferny foliage; fast growing and drought tolerant; deadhead to promote new blooms

Ornamental Features

Peter's Gold Carpet Bidens has masses of beautiful yellow daisy flowers at the ends of the stems from late spring to mid fall, which are most effective when planted in groupings. Its tiny deeply cut ferny leaves remain green in color throughout the season.

Landscape Attributes

Peter's Gold Carpet Bidens is an herbaceous annual with a trailing habit of growth, eventually spilling over the edges of hanging baskets and containers. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This is a relatively low maintenance plant, and should not require much pruning, except when necessary, such as to remove dieback. It is a good choice for attracting butterflies to your yard. It has no significant negative characteristics.

Peter's Gold Carpet Bidens is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Container Planting

Planting & Growing

Peter's Gold Carpet Bidens will grow to be about 14 inches tall at maturity, with a spread of 4 feet. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 24 inches apart. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. Although it's not a true annual, this fast-growing plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant should only be grown in full sunlight. It is very adaptable to both dry and moist growing conditions, but will not tolerate any standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Peter's Gold Carpet Bidens is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. Because of its trailing habit of growth, it is ideally suited for use as a 'spiller' in the 'spiller-thriller-filler' container combination; plant it near the edges where it can spill gracefully over the pot. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
