Description:

A delighful spring-blooming shrub with stunning deep pink flowers smothering the plant; blackish-maroon foliage maintains its color even in summer heat; an easy to grow and well-behaved shrub for general garden use; best pruning Mar-Apr

Ornamental Features

Zhuzhou Fuchsia Chinese Fringeflower is draped in stunning fragrant fuchsia strap-like flowers along the branches in early spring. It has attractive brown-variegated grayish green foliage which emerges burgundy in spring. The oval leaves are highly ornamental and turn burgundy in the fall, which persists throughout the winter. The peeling brown bark adds an interesting dimension to the landscape.

Landscape Attributes

Zhuzhou Fuchsia Chinese Fringeflower is a multi-stemmed evergreen shrub with an upright spreading habit of growth. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a relatively low maintenance shrub, and should only be pruned after flowering to avoid removing any of the current season's flowers. It has no significant negative characteristics.

Planting & Growing

Zhuzhou Fuchsia Chinese Fringeflower will grow to be about 8 feet tall at maturity, with a spread of 6 feet. It has a low canopy, and is suitable for planting under power lines. It grows at a fast rate, and under ideal conditions can be expected to live for 40 years or more.

This shrub does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is particular about its soil conditions, with a strong preference for rich, acidic soils. It is somewhat tolerant of urban pollution. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This is a selected variety of a species not originally from North America.
