

Cherry Mocha Crapemyrtle

Lagerstroemia 'Cherry Mocha'

Height: 30 inches

Spread: 30 inches

Sunlight: ☉

Hardiness Zone: 6a

Other Names: Crape Myrtle, Crepe Myrtle

Group/Class: Barista Series

Description:

This attractive ornamental shrub produces amazing fuchsia-red blooms in summer, followed by vibrant orange-red fall foliage; captivating focal point for the garden or border; dies back to ground each year in colder zones 6 and 7a, blooms on new wood

Ornamental Features

Cherry Mocha Crapemyrtle is draped in stunning panicles of fuchsia frilly flowers with red overtones at the ends of the branches from late summer to early fall. It has attractive burgundy deciduous foliage which emerges cherry red in spring. The glossy oval leaves are highly ornamental and turn antique red in fall.

Landscape Attributes

Cherry Mocha Crapemyrtle is a dense multi-stemmed deciduous shrub with an upright spreading habit of growth. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This shrub will require occasional maintenance and upkeep. Trim off the flower heads after they fade and die to encourage more blooms late into the season. It is a good choice for attracting bees to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Cherry Mocha Crapemyrtle is recommended for the following landscape applications;

- Accent
- Mass Planting
- General Garden Use
- Container Planting

Planting & Growing

Cherry Mocha Crapemyrtle will grow to be about 30 inches tall at maturity, with a spread of 30 inches. It tends to be a little leggy, with a typical clearance of 2 feet from the ground. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is particular about its soil conditions, with a strong preference for rich, acidic soils. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.

Cherry Mocha Crapemyrtle makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
